(P) = Preliminary

Employment information--by place of work--is based on quarterly reports from employers covered under New York State's Unemployment Insurance Law. Data by industry (using the new NAICS classification system) include employment; total annual and average weekly wages; and, the number of establishments. Data are available for New York State, metropolitan areas, and counties (State law prohibits us from disclosing information that would reveal the identity of individual employers). Data are available about six months following the end of the reported quarter--they are less current than non-farm employment estimates.

For more information concerning Quarterly Census of Employment and Wages (QCEW), see Technical Notes. For additional information on the various sources of employment data, see comparing sources of employment data.

Data Source: Quarterly Census of Employment and Wages, developed through a cooperative program between the State of New York and the U. S. Bureau of Labor Statistics.
